

Novel Coronavirus (COVID-19)

This illness can be mild. However, in some cases it is severe enough to require hospitalization. If you live in or have been to an area where there is ongoing spread of COVID-19 within 14 days and are experiencing these symptoms, contact your healthcare provider and tell them about your symptoms and travel.

Who is at risk?

- People who live in or who have returned from an area with ongoing spread of COVID-19.
- Individuals with close contact to a person with COVID-19.

How is it spread?

- Through the air after coughing or sneezing.
- Close personal contact with an infected person.
- Touching an object that has the virus on it, then touching your mouth, nose, or eyes.

What are the symptoms?

- Fever
- Cough
- Shortness of breath

Symptoms may appear in as few as 2 days or as long as 14 days after exposure.

To prevent illness:

- Wash your hands often.
- Avoid contact with people who are sick.
- Avoid touching your mouth, nose, or eyes.
