

Primary Care Transformation: The Role of the Registered Nurse

June 14th, 2021 Virtual
12:15-1:30 pm MST

Keynote Speaker:
Benjamin Anderson

**"Burnout and Healing in the
Face of a Global Pandemic"**

When a person exhibits noticeable declines in work performance, their colleagues and organizations are often quick to blame, punish, or even terminate employment. Some employers intuitively connect these behavior changes to signs of burnout or emotional injury and offer individual coping resources. These efforts, while well-intended and important, can seem hurtful if the causes of the burnout are structural as well as individual. In this session, Benjamin will use true stories to humanize the impact of emotional injury and offer simple tools for structural changes that lead to recovery.

Benjamin is the Vice President of Rural Health and Hospital for Colorado Hospital Association. He provides leadership on the development and execution of the Association's rural strategies, and advocates on behalf of rural hospitals, Benjamin has 20 years of experience in health care and non-profit administration.
